

# François Robben

---

## Full Stack Web Developer

francoisrobben@gmail.com | linkedin.com/in/francoisrobben

## Profile

Full Stack Web Developer with nearly 9 years of experience in designing, developing and maintaining high-performance web applications. Specialized in modern technologies such as React, Next.js and Laravel, with strong skills in CI/CD and scalable architecture. I handle full project lifecycles — from need analysis to deployment — with a constant focus on code quality, performance, and user experience.

## Key Skills

React · Next.js · Laravel · Node.js · Docker · CI/CD · MySQL · PostgreSQL · UX/UI · SEO · Project management

## Professional Experience

### Freelance Web Developer – Robbyweb

Feb 2025 – Present · Remote

- Requirement analysis and technical solution design
- Development of showcase websites, e-commerce platforms and custom business tools
- Stack varies per project: Laravel, WordPress, React, Next.js
- Full project ownership: wireframes, development, SEO, hosting, maintenance
- Client training and post-delivery technical support

### Web Developer – eFarmz, Belgium

Feb 2021 – Feb 2025 · Full-time

- First in-house web developer: established the company's web dev foundations
- Progressive migration of the website to Next.js
- Active participation in technical decisions and implementation of scalable solutions
- Reduced technical backlog and improved codebase stability
- Cross-functional collaboration with logistics, marketing, customer service, and purchasing teams
- Implemented automated testing and CI/CD pipelines to secure deployments

### Web Developer – PSIO, Brussels area

- Feb 2020 – Feb 2021 · Full-time
- Migrated legacy platform to a Laravel + React stack
- Built an online appointment booking system in React
- Integrated invoicing software Winbooks for automated billing

- Connected marketing tools, including Facebook Pixel and Conversions API
- Bug fixing and progressive refactoring
- Developed new features with both technical and business teams
- Participated in product meetings and contributed to UX improvements

### **Freelance Web Developer – Self-employed**

Mar 2018 – Feb 2020 · Europe, Australia, Balkans

- Designed and developed custom presentation and e-commerce websites
- Created visual identity and content when needed
- Managed SEO, hosting, analytics and performance monitoring
- Used WordPress, WooCommerce, Laravel, jQuery, Bootstrap
- End-to-end project management: analysis, delivery, support

### **Full Stack Developer & Support Manager – SMAG, Libramont**

May 2016 – Mar 2018 · Full-time

- Developed a custom web application (PHP, JavaScript/jQuery, MySQL)
- Implemented advanced features: GPS tracking, land management, file hosting (Google Cloud)
- Integrated official APIs from Belgian and French governments
- Managed customer support: complex cases, documentation, team training
- Bridged business needs with technical constraints
- Key contributor in Agile feature planning and technical decisions

### **Web Development Intern – Viral Bamboo, Dublin**

Feb 2016 – Apr 2016 · 3 months

- Developed projects with WordPress and Laravel
- Built a file sharing module
- Handled debugging and web scraping tasks
- Learned PHP and adapted quickly in an English-speaking environment

### **Web Development Intern – LEA, Libramont**

Nov 2015 – Dec 2015 · 2 months

- Built a real-time GPS tracking system using Google Maps and a public API
